

K-Love is about the only FM radio station I listen to in Colorado. It provides clean, uplifting music and information that is critical in a day when "anything" goes with other music. I know several of people who listen to K-Love in my area and am happy they do because of the positive effect the music played has on their life. The community is a better place because of the positive messages provided by K-Love. Please do not allow (LPFM) to have priority over current FM translators. Thank You.
